

**5062**  
**Lice and Nits**

Students found to have live head lice or live louse eggs, but not nits, will not be permitted at school and will be sent home. Upon discovering the presence of any indication of live lice or live louse eggs, but not nits, the student's parent(s) or guardian(s) will be notified, and if appropriate will be asked to pick up the student from school immediately.

Students will not be permitted to return to school until the district finds that no live lice or live louse eggs can be detected. If only nits are detected, the student will be permitted to return to school. The parent(s) or guardian(s) will be required to treat the student and accompany the student to school to be examined.

The student cannot ride the school bus until the district has cleared the student to return to school.
